Contents of Volume 40

Number 1, July 13, 1970

MITARO HIROMI. Interpretation of Dependency of Rate Parameters on the Degree of Polymerization of Substrate in Enzyme-Catalyzed Reactions. Evaluation of Subsite Affinities of Exo-Enzyme	1
ERST WILL, ERNST-GEORG KRAUSE, AND ALBERT WOLLENBERGER. A Kinetic Study of Muscle Phosphorylase <i>b</i> Variants of the Pig: Heart-Specific Isoenzyme and Skeletal Muscle Enzyme	7
ABOR KATO, JAMES YUNG, AND MILAN IHNAT. NMR Studies of the Interaction of Eserine and Atropine with Acetylcholinesterase	15
LAUS SCHWARZ, DAVID B. MILNE, AND ELIZABETH VINYARD. Growth Effects of Tin Compounds in Rats Maintained in a Trace Element-Controlled Environment	22
DITH E. HEADY AND EDWIN H. MCCONKEY. Completion of Nascent HeLa Ribosomal Proteins in a Cell-Free System	30
OVA ZEHAVID-WILLNER, NECHAMA S. KOSOWER, TIM HUNT, AND EDWARD M. KOSOWER. GSH Oxidation and Protein Synthesis in Rabbit Reticulocytes	37
URLA C. WINLUND AND MICHAEL J. CHAMBERLIN. Binding of Cytidine Triphosphate to Aspartate Transcarbamylase	43
VAN EISENBERG AND W. WAYNE KIELLEY. Native Tropomyosin: Effect on the Interaction of Actin with Heavy Meromyosin and Subfragment-1	50
WIETZERBIN-FALSZPAN, B. C. DAS, I. AZUMA, A. ADAM, J. F. PETIT, AND E. LEDERER. Isolation and Mass Spectrometric Identification of the Peptide Subunits of Mycobacterial Cell Walls	57
TRINER, Y. VULLIEMOZ, I. SCHWARTZ, AND G. G. NAHAS. Cyclic Phosphodiesterase Activity and the Action of Papaverine	64
F. ERLANGER, M. F. ISAMBERT, AND A. M. MICHELSON. Insoluble Bacterial Luciferases: A New Approach to Some Problems in Bioluminescence	70
F. DEL CAMPO, J. M. RAMÍREZ, AND J. L. CÁNOVAS. Transient Repression by AMP in <i>Escherichia coli</i>	77
TSUKO MIYAKE AND TAKASHI SUGIMURA. Utilization of Protoporphyrin for the Synthesis of Cytochrome <i>c</i> in Yeast Deficient of Heme Biosynthesis	85
CHAPPELET, C. LAZDUNSKI, C. PETITCLERC, AND M. LAZDUNSKI. The Mn^{2+} -Alkaline Phosphatase of <i>E. coli</i>	91
ARC GIRARD, LOUISE MARTY, AND FRANÇOISE SUAREZ. Capsid Proteins of Simian Virus 40	97
ROYOSHI HIDAKA, SIDNEY UDEFRIEND, AKIO NAGASAKA, AND LESLIE J. DEGROOT. Inhibition of Thyroid Iodide Peroxidase <i>in Vivo</i> and <i>in Vitro</i> by Iproniazid	103
HN H. PAZUR, HARVEY R. KNULL, AND DAVID L. SIMPSON. Glycoenzymes: A Note on the Role for the Carbohydrate Moieties	110
ARLENE DELUCA AND MARY E. DEMPSEY. Mechanism of Oxidation in Firefly Luminescence	117
SEPH T. HOLDEN, ORTRUD HILD, YEE-LING WONG-LEUNG, AND GEORGE ROUSER. Reduced Lipid Content as the Basis for Defective Amino Acid Accumulation Capacity in Pantothenate- and Biotin-Deficient <i>Lactobacillus plantarum</i>	123
HALDAR. Protein Synthesis in Mammalian Brain Mitochondria	129
AKOLI GHOSH AND H. P. GHOSH. Role of Modified Nucleoside Adjacent to 3'-End of Anticodon in Codon-Anticodon Interaction	135
S. COHEN, R. I. SHRAGER, M. MCNEEL, AND A. N. SCHECHTER. On-Line Computer-Assisted Analysis of 220 MHz NMR Data of Protein Imidazole Resonances	144
AYMOND W. RUDDON AND CYNTHIA H. RAINEY. Stimulation of Nuclear Protein Synthesis in Rat Liver After Phenobarbital Administration	152
ROSS DIXON, TERUMI FURUTACHI, AND SEYMOUR LIEBERMAN. The Isolation of Crystalline 22R-Hydroxycholesterol and 20 α ,22R-Dihydroxycholesterol from Bovine Adrenals	161
EGEHARD HOLLER, JOHN A. RUPLEY, AND GEORGE P. HESS. Kinetics of Lysozyme-Substrate Interactions	166
AMEJIRO YAMASHITA AND JAMES B. FIELD. Preparation of Thyroid Plasma Membranes Containing a TSH-Responsive Adenyl Cyclase	171
OXANNE DESLAURIERS AND IAN C. P. SMITH. Evidence from Proton Magnetic Resonance Data for the Stacking of Aromatic Amino Acids in Lysine-Vasopressin: Comparison with Oxytocin Derivatives and Related Dipeptides	179
PALATINI AND A. BRUNI. Reversal by Phospholipids of the Oligomycin Induced Inhibition of Membrane Associated Adenosintriphosphatases	186

W. I. P. MAINWARING. The Separation of Androgen Receptor and 5 α -Reductase Activities in Subcellular Fractions of Rat Prostate	1
ANTHONY D. MORRISON, REX S. CLEMENTS, JR., SUSAN B. TRAVIS, FRANK OSKI, AND ALBERT I. WINEGRAD. Glucose Utilization by the Polyol Pathway in Human Erythrocytes	1
DONALD MILLS AND SIMON KARPATKIN. Heterogeneity of Human Fibrogen: Possible Relation to Proteolysis by Thrombin and Plasmin as Studied by SDS-Polyacrylamide Gel Electrophoresis ..	2
PETER HLAVICA. Studies on the Active Site of Mixed Function Oxidases in Rabbit Liver Microsomes ..	2
DONALD T. DOWNING, DAVID G. AHERN, AND MADELINE BACHTA. Enzyme Inhibition by Acetylenic Compounds	2
WOON KI PAIK AND SANGDUK KIM. ω -N-Methylarginine in Histones	2
M. J. GILLELAND AND J. D. SHORE. The Limiting Rate of Chelation of Liver Alcohol Dehydrogenase ..	2
DIETER GALLWITZ. Extraction and Partial Purification of Two Histone-Specific Transacetylases from Rat Liver Nuclei	2
S. E. BRESLER, M. I. MOSEVITSKY, AND L. G. VYACHESLAVOV. Action of Amino Acids on the Viability of Thymine Starved <i>Bacillus subtilis</i> Cells	2
Errata	2

Number 2, July 27, 1970

SHIN LIN, MERNA VILLAREJO, AND IRVING ZABIN. β -Galactosidase: α -Complementation of a Deletion Mutant with Cyanogen Bromide Peptides	
EDMUND R. CASILLAS AND DALE D. HOSKINS. Activation of Monkey Spermatozoal Adenyl Cyclase by Thyroxine and Triiodothyronine	
ROBERT W. HARTLEY. Derivatives of <i>Bacillus Amyloliquefaciens</i> Ribonuclease (Barnase) Isolated after Limited Digestion by Carboxypeptidases A and B	
FERMIN ROSALES, SARAH J. RITARI, AND WARWICK SAKAMI. Formation of the N ⁵ -Methyltetrahydrofolate-Homocysteine Methyltransferase Holoenzyme from Apoenzyme and Adenosyl-B ₁₂	
E. L. THOMAS AND H. N. CHRISTENSEN. Indications of Spatial Relations Among Structures Recognizing Amino Acids and Na ⁺ at a Transport Receptor Site	
DAVID R. PHILLIPS AND MARTIN MORRISON. The Arrangement of Proteins in the Human Erythrocyte Membrane	
ALLEN J. ST. ANGELO AND ROBERT L. ORY. Localization of Allantoinase in Glyoxysomes of Germinating Castor Beans	
YOSHIYUKI ICHIKAWA AND TOSHIO YAMANO. Cytochrome b ₅ and Co-Binding Cytochromes in the Golgi Membranes of Mammalian Livers	
YOSHIYUKI KUCHINO AND SUSUMU NISHIMURA. Nucleotide Sequence Specificities of Guanylate Residue-Specific tRNA Methylases from Rat Liver	
S. BOUCHILLOUX, O. CHABAUD, M. MICHEL-BÉCHET, M. FERRAND, AND A. M. ATHOUËL-HAON. Differential Localization in Thyroid Microsomal Subfractions of a Mannosyltransferase, Two N-Acetylglucosaminyltransferases and a Galactosyltransferase	
F. SCHAPIRA, M. D. REUBER, AND A. HATZFELD. Resurgence of Two Fetal-Type of Aldolases (A and C) in some Fast-Growing Hepatomas	
RUTH S. QUINN AND ELKAN R. BLOUT. Spectrofluorometric Assay for Elastolytic Enzymes	
S. T. JACOB, W. MUECKE, E. M. SAJDEL, AND H. N. MUNRO. Evidence for Extranucleolar Control of RNA Synthesis in the Nucleolus	
DONALD G. DAVIS, NANCY H. MOCK, TED R. LINDSTROM, SAMUEL CHARACHE, AND CHIEN HO. Nuclear Magnetic Resonance Studies of Hemoglobins. V. The Heme Proton Spectra of Human Deoxyhemoglobins A, F, Zürich, and Chesapeake	
ALBERT SIEGEL AND ROSELLA HUBER. Complementary Regions to Tobacco Mosaic Virus RNA in Host DNA	
T. L. ZAETZ. Effect of Epinephrine and its Precursors on Activity of Proteolytic Enzymes	
AUDREY A. PAINTER AND F. EDMUND HUNTER, JR. Phosphorylation Coupled to Oxidation of Thiol Groups (GSH) by Cytochrome C with Disulfide (GSSG) as an Essential Catalyst. I. Demonstration of ADP Formation from AMP and HPO ₄ ²⁻	

OREY A. PAINTER AND F. EDMUND HUNTER, JR. Phosphorylation Coupled to Oxidation of Thiol Groups (GSH) by Cytochrome C with Disulfide (GSSG) as an Essential Catalyst. II. Demonstration of ATP Formation from ADP and HPO_4^{2-}	369
OREY A. PAINTER AND F. EDMUND HUNTER, JR. Phosphorylation Coupled to Oxidation of Thiol Groups (GSH) by Cytochrome C with Disulfide (GSSG) as an Essential Catalyst. III. Uncoupling and Uncoupler-Dependent ATPase	378
OREY A. PAINTER AND F. EDMUND HUNTER, JR. Phosphorylation Coupled to Oxidation of Thiol Groups (GSH) by Cytochrome C with Disulfide (GSSG) as an Essential Catalyst. IV. Stability of Intermediates and Possible Mechanism of Reaction	387
HIKO TAKESUE AND TSUNEO OMURA. Immunological Similarity Between NADH-Cytochrome <i>c</i> Reductases of Mitochondrial Outer Membrane and Microsomes	396
SHADURI, N. K. CHATTERJEE, K. K. BOSE, AND N. K. GUPTA. Initiation of Protein Synthesis in Rabbit Reticulocytes	402
IL H. PATTERSON AND W. J. LENNARZ. Novel Protein Composition of a Bacterial Membrane	408
NATHAN P. LEIS AND ELIZABETH B. KELLER. Protein Chain Initiation by Methionyl-tRNA	416
SWAMINATHAN AND OM P. BAHL. Dissociation and Recombination of the Subunits of Human Chorionic Gonadotropin	422
R. GURLEY, R. A. WALTERS, AND M. D. ENGER. Isolation and Characterization of Histone fl in Ribosomes	428
EL FRANZBLAU, ANDREW H. KANG, AND BARBARA FARIS. <i>In Vitro</i> Formation of Intermolecular Crosslinks in Chick Skin Collagen	437
NETTE BAICH AND SUZANNE HAGAN. Inhibition of Aspartokinase and N-Acetylglutamokinase of <i>Escherichia coli</i> by Hexosemonophosphates and AMP	445
JO R. DE KLOET, VIRGINIA S. MAYO, AND BENVENUTO A. G. ANDREAN. Disaggregation of Giant "DNA-Like RNA" of Yeast by Denaturation in the Presence of Formaldehyde	454
Y. LAI, C. CHEN, AND B. L. HORECKER. Primary Structure of Two COOH-Terminal Hexapeptides from Rabbit Muscle Aldolase: A Difference in the Structure of the α and β Subunits	461
I-LIN LEE AND FRANCIS T. KENNEY. Induction of Alanine Transaminase by Adrenal Steroids in Cultured Hepatoma Cells	469
HUNTOON AND G. J. SCHROEPFER, JR. Enzymatic Conversion of Cholest-8(14)-EN-3 β , 15 α -DIOL and Cholest-8(14)-EN-3 β ,15 β -DIOL to Cholesterol	476

AUTHOR INDEX	

Information for Contributors

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

In order to assure rapid and accurate publication, it is essential that manuscripts be prepared according to the instructions given below. Manuscripts which do not conform to these specifications may have to be returned for retyping.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on $8\frac{1}{2} \times 11$ " high quality paper (the complete manuscript, including space occupied by figures and tables, should be not more than 8 pages long).

Summary: The article must be preceded by a brief summary, typed single-spaced, not to exceed 10 lines in length (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Since articles are reproduced directly from manuscripts, the latter must be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used, and special care should be taken to insure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division, and punctuation.

Manuscripts should be double-spaced, on only one side of the sheet; **references, footnotes, and figure legends should be single-spaced.** Typing area of the page must be as close as possible to $6\frac{1}{2}$ " wide by $9\frac{1}{2}$ " long.

Use of Symbols and Abbreviations. Abbreviations except for those in the Commission on Biochemical Nomenclature Document #1 (*Arch. Biochem. Biophys.* **115**, 1-12 (1966)) must be defined, and ambiguous abbreviations such as TCA, or P to signify anything but phosphate, should be avoided. Authors are urged to use chemical formulas, such as CCl_3COOH , wherever possible. If improper abbreviations are used it may be necessary to return manuscripts for retyping, which will delay their publication.

Footnotes should be typed single-spaced, at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. Photographs are acceptable. Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink. Illustrations and tables should be submitted on separate sheets. **Do not attempt to insert the figures, figure legends, or tables into the text.** This will be done by the Publishers.

All drawings should be done in black ink on white paper or tracing cloth; they must be planned for reduction to a width of not more than 5". Final size of the printed page is $5\frac{1}{2} \times 8\frac{3}{8}$ "; figures must be planned to fit these proportions.

Graph paper, if used, should be ruled in blue; grid lines that are to show in the final reproduction should be inked in black. High quality glossy prints are acceptable.

Page Numbers and Headings. Page numbers should be written lightly in blue (not typed) at the bottom of each page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature may be cited by number and listed in numerical order in a single-spaced list placed at the end of the manuscript. Abbreviations of journal titles should be those used in *Chemical Abstracts*.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Reprints

Reprint order forms are sent to the authors immediately upon acceptance of their manuscripts. The price list is included.
